Querying a database using open source voice control software
By Colin Beckingham on May 16, 2008 (9:00:00 AM)

Though the tools for voice control and dictation in the open source world lag far behind those in the commercial arena, I decided to see how far I could get in querying a database by voice and having the computer respond verbally. Using a number of open source tools, I'm happy to report success.

Adobe releases Adobe Flash Player 10 beta for Linux
By Steven J. Vaughan-Nichols on May 15, 2008 (8:00:00 PM)

Adobe Systems is reaching out to Linux desktop users with its announcement today that the first beta of Adobe Flash Player 10, a.k.a. Astro, is now available for Linux, as well as Windows and Mac OS X.

Building a glossier front end for MythTV
By Nathan Willis on May 15, 2008 (7:00:00 PM)

Josh Stewart loves MythTV -- so much so that he is building his own front-end app for it as a drop-in replacement for MythTV's default. The replacement is called Gloss, and although it isn't ready for prime time yet (no pun intended), its OpenGL effects and GStreamer bindings show plenty of promise.

Dreamy Dreamlinux
By Preston St. Pierre on May 15, 2008 (4:00:00 PM)

Dreamlinux is a Debian-based distribution that offers you a choice of GNOME or Xfce window managers as well as an extremely simple installation and scripts to install popular programs not found in the Debian repositories. With included programs for communication, graphics, and music, plus OpenOffice.org, it covers most general desktop needs, and installation and configuration are a breeze. Besides a few minor bugs that didn't cause any problems, my experience with Dreamlinux was entirely positive.

Security Alert: Debian OpenSSL flaw affects many systems
By Joe Barr on May 15, 2008 (2:49:18 PM)

Well-known security researcher H. D. Moore, creator of the MetaSploit Project, has posted his findings on the recently discovered Debian-packaged OpenSSL bug. Moore documents the cause of the bug and

Linux - easier to run by the release 1 hour, 14 minutes ago
We've seen recently how fast Linux is moving and how many changes and updates are quickly and constantly being made. One of the biggest advancements across a variety of Linux distributions has been the growing variety and ease of ways to run Linux, including on, alongside or inside Windows.

Fedora 9 - an OS that even the Linux challenged can love 3 hours, 14 minutes ago
Fedora 9, the latest release from the Fedora Project, goes up for download on Tuesday. The ninth release of Fedora ushers in a number of changes aimed at making the venerable distribution a more newbie-friendly desktop, but longtime users needn't fear a great dumbing down; version 9 packs plenty of power user punch as well.

Low-end RAID controllers support Linux 5 hours, 14 minutes ago
Adaptec has announced a new family of entry-level RAID controllers that support RAID 0, 1, and 10. The Series 2 RAID controllers ship with open-source Linux drivers and are designed for controlling low-cost SATA and SAS disk and tape-drive systems, says the company.
